

Stage Lighting Equipment Usage

Overview

The lighting equipment was purchased by the Live Entertainment committee for Live Entertainment functions. The cost of purchasing and maintaining the equipment is considerable. It is therefore necessary to establish a stage lighting usage policy to monitor and control the usage.

Stage Lighting Equipment Usage Policy

1. The equipment can be used by other committees if approved by the lighting director one week prior to event.
2. This equipment cannot be removed from the Club House Hall.
3. Only trained operators may operate the equipment.
4. The spot lights are fragile and will be used by Live Entertainment personnel only. Currently we have three trained people to run the lighting controller. They are Perry Nadeau, Joe Weyerstrass and Vic Meyer.
